RE: Pavillion Working Group Request Response

Dear Director Parfitt:

In response to your January 30, 2014 letter, received via first class mail on February 7, 2014, the Wyoming Oil and Gas Conservation Commission (WOGCC) offers the following regarding your questions on the access and availability of pertinent data related to domestic water well quality in our possession. The WOGCC has reviewed all data in its possession and has determined that it has either previously provided such information to your staff and other interested parties or it is not pertinent to that aspect of the investigation.

Should you or any of your staff believe there is specific information or data that would benefit your work please don't hesitate to have them contact me or Tom Kropatsch in my office to seek such information specifically. In the event the WOGCC receives any information or documents in the future that is related to this issue we will promptly provide them to you.

We appreciate the cooperative manner in which your staff has worked with the WOGCC in the past and look forward to continuing such a beneficial relationship.

Sincerely,

Grant E. Black
State Oil and Gas Supervisor
Wyoming Oil and Gas Conservation Commission

Cc: Tom Kropatsch
Jeremiah Rieman
